DETAILED ACTION

1. Claims 67 and 88-103 are pending. Claims 1-22, 23-44, 45-66, and 68-87 have been cancelled either in the communication filed 1/30/06 or prior communications and claims 88-103 are new claims.
2. The 35 USC 112, second paragraph rejection and claim objection of claim 75 has been overcome by the cancellation of claim 75 and is hereby considered moot.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 67 and 88-100, drawn to processing loan data, classified in class 705, subclass 38.
 - II. Claims 101-103, drawn to receiving and decomposing vintage performance data for a performance variable, classified in class 705, subclass 36.

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case Group I processes the loan data and Group II receives and decomposes (uses) the data to arrive at a performance variable.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper. Group I requires the search for processing loan data and Group II requires a search for performance data for the performance variable and decomposing the data into component parts.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants' are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
